

KNOLL To **W**ND **F**ARM

Progress Update

Dear Brent Knoller

Further to the recent meeting at Brent House, the kNOll to Windfarm Action Group has made significant progress, thanks to many people volunteering their assistance;

We have set up a large research committee, examining the potential impact of the windfarm in terms of;

- * **Local environment;**
- * **Local economy;**
- * **Health and Safety;**
- * **Local infrastructure.**

And have been sourcing information from around the World. We are making good progress in understanding the pertinent issues.

Our fund raising committee will be starting a fast and furious fund raising campaign this week, to enable us to;

- * Obtain professional planning advice to assist with our objection to the Windfarm; and
- * To raise awareness of the issues with all the stakeholders in the local community;

Please contribute as much as you can.

Our communications team has raised coverage in regional and local newspapers and radio. We have arranged meetings with local politicians, including David Heathcoat-Amory, our local MP.

We have also set up a Green Action group; more of which in a couple of weeks.

This is all good progress in a couple of weeks!

We have set out our contact names, and some useful websites, as promised, below:
